Summary

Full-Stack Developer experienced in building secure, scalable, and user-focused web applications using **Django, React, TypeScript, and Node.js**. Skilled in developing workflow automation systems, document processing features, and clean UI implementations aligned with product requirements. Strong ability to deliver maintainable architecture, optimize performance, and collaborate in Agile development environments.

Core Focus Areas: • Django + REST API Development • React & TypeScript Front-End Engineering • Document & Workflow Automation • Scalable Full-Stack Solutions (Node.js / MERN) • UI/UX Optimization & Product-Driven Development

Experience

02/2025 – Present Addis Ababa, Ethiopia	Addis Ababa Innovation Technology Development Bureau - Smart Office Upgrade <i>Front-End Software Developer (React.js – MERN Stack), Tria Trading PLC</i> - Redeveloped the Smart Office system with MERN stack, enhancing letter workflows for 15+ government bureaus. - Developed and maintained responsive, user-friendly front-end interfaces using React.js, ensuring improved usability, accessibility, and system performance. - Built responsive, pixel-perfect React interfaces from Figma designs, boosting usability and adoption by 30%. - Collaborated with backend teams to integrate APIs and cut page load times by 25%. - Participated in UI/UX enhancement initiatives, refining layouts, form validations, and navigation flows to ensure an intuitive and efficient user experience. - Contributed to system testing, bug fixing, and performance tuning before final deployment. Methodology: Agile/Scrum — 2-week sprints; Jira for backlog; role: front-end developer (sprint planning, code reviews, demos).
09/2025 – 10/2025 Bali, Indonesia	Backend Developer (Nest.js) <i>EffortX (Contract, Remote, 13 hrs/week)</i> - Designed and developed modular backend services using Nest.js and Node.js. - Created secure RESTful APIs and implemented authentication & authorization layers. - Added Redis caching to improve performance and query response speed. - Designed optimized PostgreSQL schemas and ensured scalable system architecture. - Integrated uptime analytics, automated alerts, and system health checks. Methodology: Agile (trello) — continuous delivery and observability; role: backend developer (monitoring & resiliency).
12/2024 – 08/2025 London, UK	Lead Backend Developer (Django REST) <i>Pay My Fees App (Freelance)</i> - Led backend architecture for a P2P fee payment system using Django REST Framework. - Built secure APIs for real-time transactions and reporting modules. - Implemented payment validation, audit trails, and access control. - Collaborated with the Next.js frontend team to ensure seamless API communication. Methodology: Scrum — fortnightly sprints with CI/CD; role: backend lead (design, security, release gating).

09/2023 – 02/2024

Full Stack Developer (Django REST)

AHF Mortgage | Freelance

- Developed a lead management system for mortgage applications using Django REST and React.
- Integrated Twilio API for real-time SMS/email notifications.
- Created interactive dashboards for loan originators to manage client interactions.
- Implemented role-based access control and optimized API performance.

Methodology: Agile — iterative feature delivery, CI/CD with automated tests.

06/2023 – 08/2023

Addis Ababa, Ethiopia

Full Stack Developer (Django & React)

Work-Relation Project (Freelance)

- Built a web-based project management platform for contractors and consultants.
- Designed dashboards for tracking project milestones and deliverables.
- Developed REST APIs and React-based UIs for efficient communication.
- Added real-time notifications for progress and role-based reporting.

Methodology: Waterfall — milestone-based delivery (design → dev → deployment).

Education

2023

Addis Ababa

Bachelor of Science, Computer Science

Addis Ababa University

Skill Highlights

Frontend

React.js, SPFx, Next.js, Bootstrap, Material UI, Shadcn, Tailwind

Databases

PostgreSQL, MongoDB, Redis

Backend

Django REST, Node.js, Nest.js, MERN stack

Other Tools

Docker, Git, CI/CD pipelines, SharePoint (SPFx)

Languages

Python, JavaScript, C++, HTML/CSS

Projects

12/2022 – 05/2023

Bid Management System

Developed a MERN-based web app for bid automation, including project tracking, authentication, and analytics.

Methodology: Waterfall — requirements-driven milestones and formal sign-off.

2022

Tour & Travel Website

Developed a responsive site using HTML, CSS, JavaScript, PHP, and MySQL, focusing on front-end design and usability.

Methodology: Waterfall — milestone-based delivery (design → dev → deployment).

2021

Library Management System

Web Development Projects:

Created a library management system in C++ for resource management, including book/member handling and loan tracking.

Methodology: Academic/Waterfall — specification and sequential implementation.

Certifications

• ODC Software Development Tools

• Derja Soft Skill Training

• EvaSUE Certificate of Appreciation

• Data Analysis Fundamentals (Udemy)

• Fundamentals of Programming (Udemy)
